

Removal of PEG-400 from Basic Compound Solution by SPE

Waters Corporation

This is an Application Brief and does not contain a detailed Experimental section.

Abstract

This application brief demonstrates analysis of removal of PEG-400 from basic compound solution by SPE.

Introduction

The method described in this application note allows for high retention of bases in acidified samples.

Experimental

OASIS® MCX SPE METHOD

Conditions for Oasis® MCX Cartridge,
6 cc/150 mg (60 µm), Part Number 186000255

EVAPORATE AND RECONSTITUTE

Wash #2 (methanol) will contain acids and neutrals retained by reversed-phase interaction. This fraction may be analyzed for those compounds if desired.
