Advil Allergy Sinus Tablet: Oasis MCX

Waters Corporation

Abstract

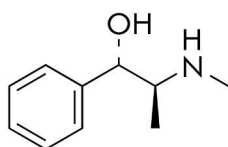

This application note highlights analysis of advil allergy sinus tablet using Oasis MCX.

Introduction

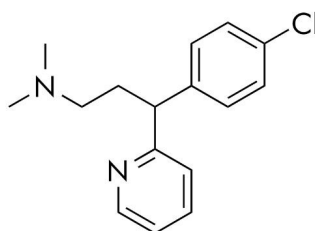

This formulation is a good example of a mixture of bases and an acid. The Oasis 2x4 Method was employed and the Oasis MCX plates resulted in the best recoveries for all three analytes.

The compounds used in this study are -

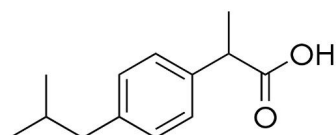

- Pseudoephedrine
- Chlorpheniramine
- Ibuprofen

Pseudoephedrine (Base)
MW 165.2
pKa 9.9

Chlorpheniramine (Base)
MW 274.8
pKa 9.2

Ibuprofen (Acid)
MW 206.3
pKa 5.2
