

Verification Statement related to Waters Technologies Corporation's GHG Inventory (Scope 1 and Scope 2 only) for Calendar Year 2025

Terms of Engagement

This Verification Statement has been prepared for Waters Technologies Corporation in accordance with ISO 14064-3: 2019 Part 3.

WAP Sustainability (WAP) was commissioned by Waters Technologies Corporation (Waters) to assure its Scope 1 and Scope 2 GHG emissions for the calendar year 2025, which was prepared in accordance with WRI/WBCSD GHG Protocol Corporate Accounting and Reporting Standard (hereafter referred to as "the Inventory").

Waters's management was responsible for preparing the Inventory and for maintaining effective internal controls over the data and information disclosed. WAP's responsibility was to carry out a verification engagement on the Inventory in accordance with the contract with Waters.

Ultimately, the Inventory has been approved by and remains the responsibility of Waters.

WAP's Approach

Our verification has been conducted in accordance with the ISO Standards and WAP's internal verification procedures to provide limited assurance on the GHG emissions reported by Waters.

To form our conclusions, the verification engagement was undertaken as a sampling exercise and covered the following activities:

- Discussed reporting content with the relevant staff of the organization responsible for managing the inventory;
- Checked the emission factors and emission calculation to ensure the accuracy, completeness, and transparency of the reporting;
- Sampled and reviewed the raw data collected to ensure accuracy and consistency.

Level of Verification & Materiality

The opinion expressed in this Verification Statement has been formed on the level of limited assurance and at a materiality of the professional judgment of the Verifier.

WAP's Opinion

Based on WAP's approach, nothing has come to our attention that would cause us to believe that the total Scope 1 and Scope 2 GHG emissions disclosed by Waters for CY 2025 are not materially correct and that the GHG Emissions Inventory has not been prepared in conformance with the WRI Greenhouse Gas Protocol Corporate Accounting and Reporting Standard.

Signed,

Nidhi Singh
Lead Verifier
WAP Sustainability

June 2nd, 2026

Summary of Waters’s GHG Emissions Inventory for Scope 1 and Scope 2 for
Calendar Year 2025

CY 2025	Category	Operational Emissions Source	Value (MT of CO2e)
Scope 1	Facilities and Offices	Stationary Combustion	5,520
	Fleet	Mobile Combustion	7,270
	Facilities and Offices	Fugitive Emissions	439
Scope 1 Subtotal			13,228
Scope 2	Facilities, Offices and Fleet	Electricity (Location-based)	19,075
		Electricity (Market-based)	7,096
Scope 1 and 2 Total (Location-based)			32,304
Scope 1 and 2 Total (Market-based)			20,324
MT CO2e = metric tonnes of carbon dioxide equivalents			

This Verification Statement is subject to the provisions of this legal section:

This Verification Statement is only valid when published with the emissions data to which it refers. It may only be reproduced in its entirety.

WAP Sustainability Consulting, LLC and their respective officers, employees or agents are, individually and collectively, referred to in this Legal Section as WAP assumes no responsibility and shall not be liable to any person for any loss, damage or expense caused by reliance on the information or advice in this document or howsoever provided, unless that person has signed a contract with WAP for the provision of this information or advice and in that case any responsibility or liability is exclusively on the terms and conditions set out in that contract.

Due to inherent limitations in any internal control, it is possible that fraud, error, or non-compliance with laws and regulations may occur and not be detected. Further, the verification was not designed to detect all weakness or errors in internal controls so far as they relate to the requirements set out above as the verification has not been performed continuously throughout the period and the verification carried out on the relevant internal controls were on a test basis. Any projection of the evaluation of control to future periods is subject to the risk that the processes may become inadequate because of changes in conditions, or that the degree of compliance with them may deteriorate.

The English version of this Verification Statement is the only valid version. WAP assumes no responsibility for versions translated into other languages.
